# ELOCK

## Circuit Lockout Kits

These NFPA 10.6.5 compliant lockout kits ensure the critical fire alarm, emergency communications system, bi-directional amplifier, or emergency responder communications enhancement system circuits within your electrical panel will always be clearly identified, preventing accidental deactivation or unapproved resetting of the breaker during service.

## SPECIFICATIONS

Each circuit breaker lockout tab shall be constructed of steel and powder coated red with white lettering labeled "FIRE ALARM" or "BDA ERCES". A single hex screw will thread into the lockout tab with provided hex key. Adhesive sheet shall include stickers for labeling locked out circuit relevant to application.
