FEATURES

- 18 gauge steel construction
- Spring-loaded slide in design
- Durable galvanized finish

MMB

Mini Module Bracket

Engineered to mount the smaller Honeywell “Mini Module” Addressable Monitoring Modules, this bracket can hold both Clip and Flash Scan protocol units.

SPECIFICATIONS

The MMB is a bracket engineered to “Hard Mount” the smaller Honeywell “Mini Module” Addressable Monitoring Modules. This Bracket can hold both Clip and Flash Scan protocol units. Each bracket holds one Mini Mod and can be mounted in one of several positions due to the multiple hole configurations on the bracket. Made of sturdy 18 gauge galvanized cold rolled steel the brackets measure 1.75” H x 2.75” W x 1” D. This bracket makes easy and clean work of mounting these units into systems. The MMB is ideally suited for use in the Space Age IF, TC and ACE Series Cabinets, as well as the FB4 Fire Box unit. The ETC Emergency Telephone Cabinet phone bracket has studs added to accommodate the installation of an MMB. The associated Mini Module is used for supervising the condition of the phone cradle and to initiate connection to the Fire Fighter’s Phone.
