

ELOCK-GD

Gas Detection Circuit Lockout Kit

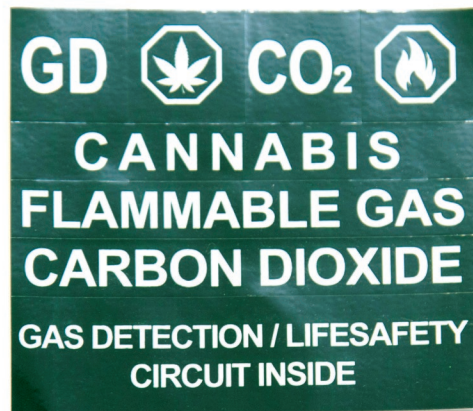

FEATURES

- NFPA 715 compliant
- Green circuit breaker lockout tab labeled “GAS DETECTION”
- Hex key included
- Adhesive sheet with stickers for labeling locked out circuit

This NFPA 715 compliant lockout kit ensures the critical gas detection system circuits within your electrical panel will always be clearly identified, preventing accidental deactivation or unapproved resetting of the breaker during service.

SPECIFICATIONS

Each circuit breaker lockout tab shall be constructed of steel and powder coated green with white lettering labeled “GAS DETECTION”. A single hex screw will thread into the lockout tab with provided hex key. Adhesive sheet shall include stickers for labeling locked out circuit, including “GD”, “CO₂”, “CANNABIS”, “FLAMMABLE GAS”, “CARBON DIOXIDE”, “GAS DETECTION/LIFE SAFETY CIRCUIT INSIDE”, and symbols representing cannabis and fire.

**Peel and stick the label relevant to your application*
